Gautam Jayasingh Ramdevsingh

Aspiring AI/ML Engineer & Data Scientist | Python | SQL

jayasingh01134@gmail.com | 9104672250 | Surat , Gujarat

https://github.com/Jayasingh0404 | https://www.linkedin.com/in/jaya-singh-rajput-921024338/

Skills

Hard Skills: HTML/CSS, Python, React.js, MongoDB, Java, Deep Learning, SQL, GitHub, FastAPI, AI/ML

Soft Skills: Communication, Critical thinking, Time Management, Decision-Making, Presentations

Work Experience

AIML Intern - Uptoskills *Jun 2026 - Sep 2026*

HTML/CSS, Python, JavaScript, Supervised Learning, Unsupervised Learning, Deep Learning, Natural Language Processing (NLP), Generative AI

AI Companion | Python, FastAPI, NLP, RAG, OpenAI, Firebase Developed an AI-powered conversational chatbot using Python, FastAPI, NLP, RAG, and OpenAI LLMs to generate context-aware responses.Implemented sentiment analysis and emotion detection using VADER, TextBlob, AFINN, and GoEmotions for emotion-aware conversations.Built a Retrieval-Augmented Generation (RAG) pipeline using TF-IDF and a knowledge base to retrieve relevant context before response generation.Integrated Firebase for user authentication and application data management, with fallback mechanisms for reliable chatbot responses.

Technical Projects

AI-companion *2026*

HTML/CSS, Python, Deep Learning, Natural Language Processing (NLP), Computer Vision, Reinforcement Learning, Generative AI, AI Model Optimization

GitHub Repository Live Demo

AI Companion | Python, FastAPI, NLP, RAG, OpenAI, FirebaseDeveloped an AI-powered conversational chatbot using Python, FastAPI, OpenAI LLMs, and NLP for context-aware and personalized user interactions.Implemented sentiment analysis and emotion detection using VADER, TextBlob, AFINN, and GoEmotions to identify user emotions and generate empathetic responses.Designed a Retrieval-Augmented Generation (RAG) pipeline using TF-IDF-based similarity search and a knowledge base to retrieve relevant context and improve response accuracy.Integrated Firebase authentication and data management and implemented fallback mechanisms for reliable AI response generation.Processed conversational and emotion da

BharatStandards-AI *2026*

Python, React.js, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, AI Model Optimization, AI/ML

GitHub Repository Live Demo

BharatStandards-AI is an AI-powered compliance assistant for Indian Standards and BIS certification research. Developed a full-stack application using React.js, JavaScript, Vite, Tailwind CSS, Python, and FastAPI with REST APIs. Implemented AI/LLM and Retrieval-Augmented Generation (RAG) for intelligent document search, question answering, and standards-focused information retrieval. Added document processing and backend services to organize compliance information. Used Git, GitHub, Docker, and GitHub Actions for version control, containerized development, CI/CD, and frontend deployment. The project reduces manual standards research and provides faster access to structured compliance data.

Scraptrade *2026*

Python, B2B Sales, APIs, Docker, REST APIs, SQL, Flask, GitHub

GitHub Repository Live Demo

Architected and deployed ScrapTrade Hub, a production B2B circular economy scrap marketplace connecting industrial sellers and verified recyclers. Built with Python, Flask, and SQLite, engineering dual trading mechanisms (forward catalog and reverse procurement bidding) with an automated bid comparison matrix. Implemented a secure fulfillment pipeline with held escrow payments, weighbridge mismatch tolerance algorithms (<5% threshold), Google OAuth 2.0 authentication, and dynamic reliability scoring (0-100). Containerized via Docker, deployed with Gunicorn WSGI on Render cloud, and achieved 100% test pass rate across 16 Pytest integration suites.

Problem Solving & Data Structures

LeetCode

Problem-solving and Data Structures with hands-on experience in Java and DSA. Skilled in Arrays, Strings, Linked Lists, Stacks, Queues, Hashing, Trees, Graphs, Recursion, Sorting, and Searching. Experienced with Two Pointers, Sliding Window, Binary Search, Greedy Algorithms, Dynamic Programming, Backtracking, and Boyer-Moore Voting Algorithm. Strong understanding of Big-O complexity, optimization, and algorithmic problem solving. Regularly practice LeetCode and ALTA APEX 151 DSA challenge.

Education

Ajeenkya DY Patil University

B.Tech | Computer Science & Information Technology (2024 - 2028)

Vanita Vishram Athwagate Surat

Class XII (2024) **Percentage: 55.2**

Certifications

- Nirmaan Hackathon - Amity university (April 2026 - April 2026)
  Skills learned: Presentations, Supervised Learning, Unsupervised Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, AI Model Optimization
- AI for Bharat 2026 Hackathon - AWS (February 2026 - February 2026)
  Skills learned: HTML/CSS, Python, Presentations, HuggingFace, GitHub, FastAPI, Machine Learning, AI/ML
- Java concept - Infosys (March 2025 - March 2025)
  Skills learned: Java
- Java essentials - Infosys (March 2025 - March 2025)
  Skills learned: Java
- AI tools and chatgpt workshop - be10x (November 2025 - November 2025)
  Skills learned: Python, Generative AI, AI Model Optimization, GitLab CI/CD

Achievements

- Recognized among top 2000 College Ambassadors for Techfest, IIT Bombay, Asia's largest festival.
